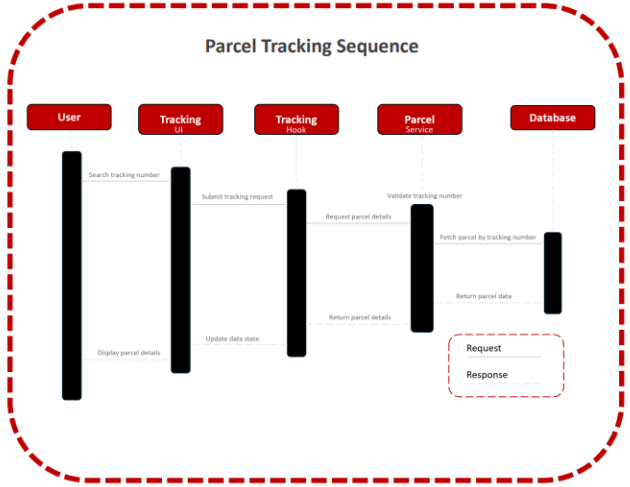
Sequence Diagram



Summary

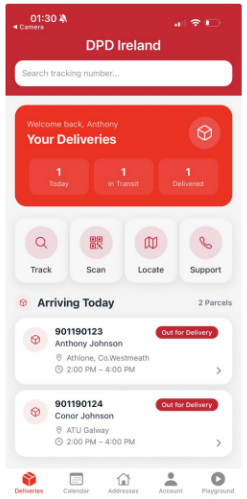
This project involved the redesign and development of a modern **DPD Parcel Wizard mobile app** to improve the customer parcel delivery experience.

- Track Deliveries
- View Delivery Schedules
- Manage Delivery and Account Details

The system was built using a **modular mobile app architecture**, focusing on **usability, scalability, and modern UI/UX design**.

The final result is a realistic prototype that provides DPD customers with a modern user experience that gives them full control over their deliveries.

Home Screen



Quick Parcel Access

Users can instantly search for a parcel from the home screen using a tracking number, reducing the number of steps needed to access delivery information.

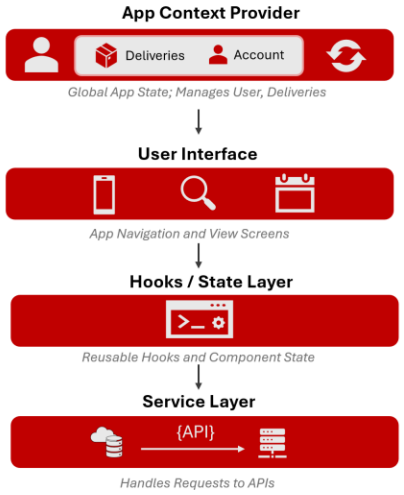
Fast Access

Key features such as **tracking, QR scanning, DPD site location, and support** are placed directly on the home screen to improve convenience and reduce navigation time.

Delivery Overview

The home screen provides a clear summary of parcels that are **arriving today, in transit, or delivered**, allowing users to see important delivery information.

Architecture Diagram



Technologies Used

Frontend
- React Native
- Expo
- Expo Router

Backend
- Python
- FastAPI
- PostgreSQL

Architecture
- Custom Hooks
- Service Layer
- Mock Data Layer

Planning & Design
- Figma
- Jira

Calendar Screen

Interactive Delivery Calendar

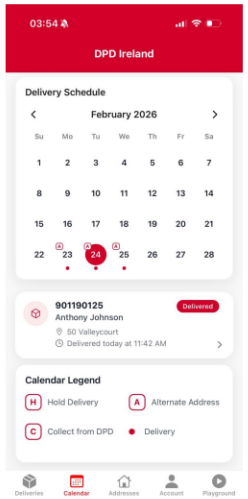
This screen was designed to improve delivery visibility by allowing users to quickly identify days with expected parcel activity.

Schedule Management

Users can create delivery instructions such as **hold delivery, redirect to another address, or collect from a DPD location**, helping them manage deliveries more flexibly.

Clear Visual Feedback

Icons, visual markers, and a calendar legend were used to ensure delivery actions are easy to understand.



Introduction

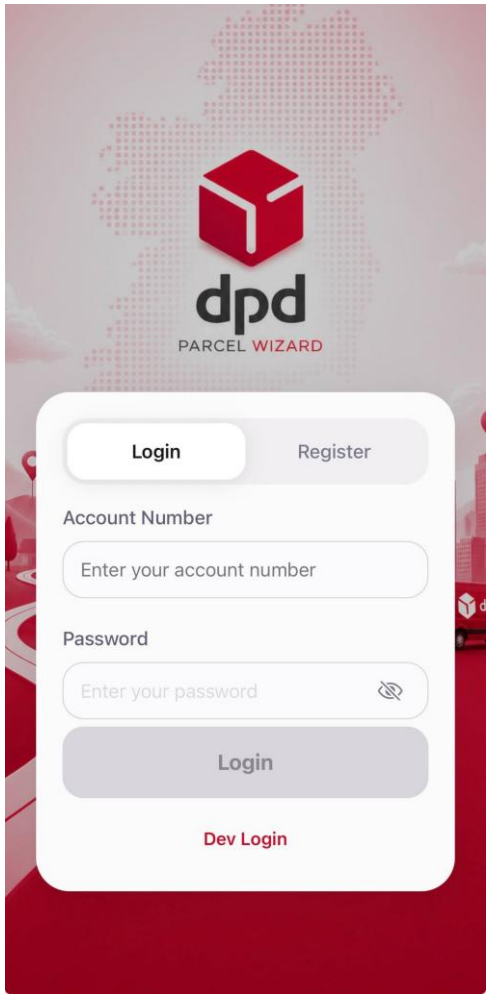
DPD Parcel Wizard

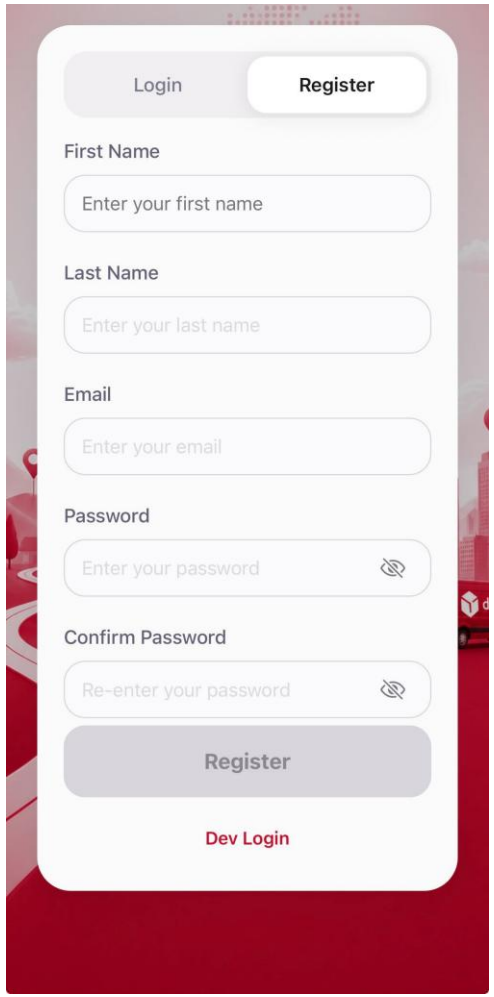
Simplify your parcel experience by managing deliveries, tracking parcels, scheduling drop-offs and pick ups, managing addresses, and getting instant support – all from one intuitive mobile app.

Login

Secure Onboarding

Log in with your Parcel Wizard account number and password or create a new account directly in the app.





Home

Welcome & Overview

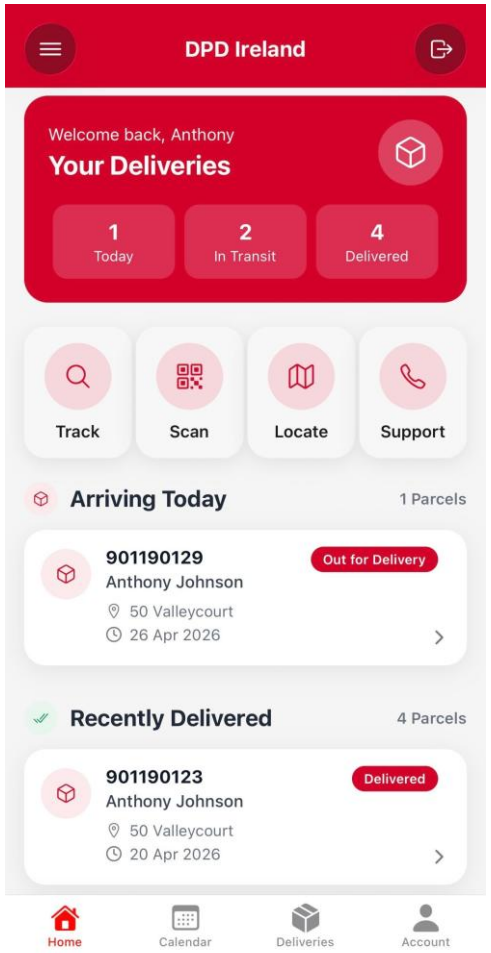
On login you are greeted with a personalised welcome card and an overview of your deliveries

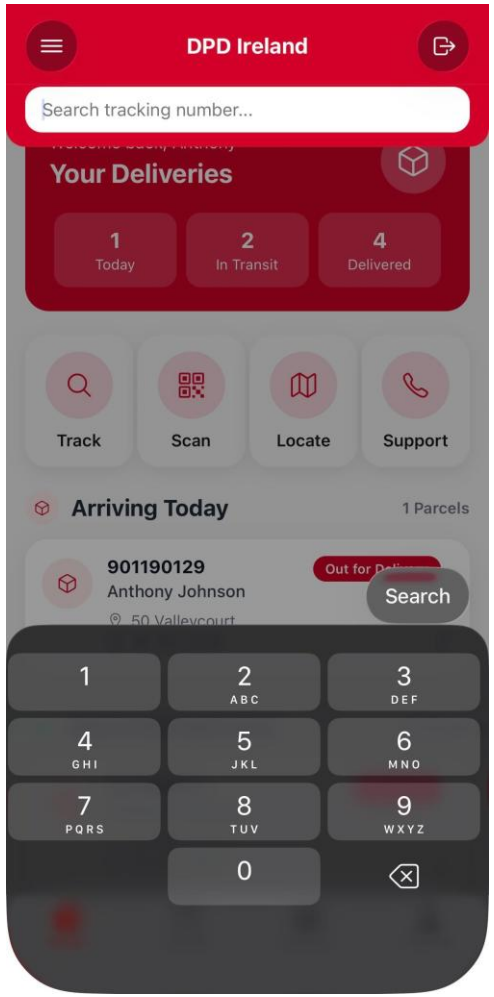
Arriving Today & Recent

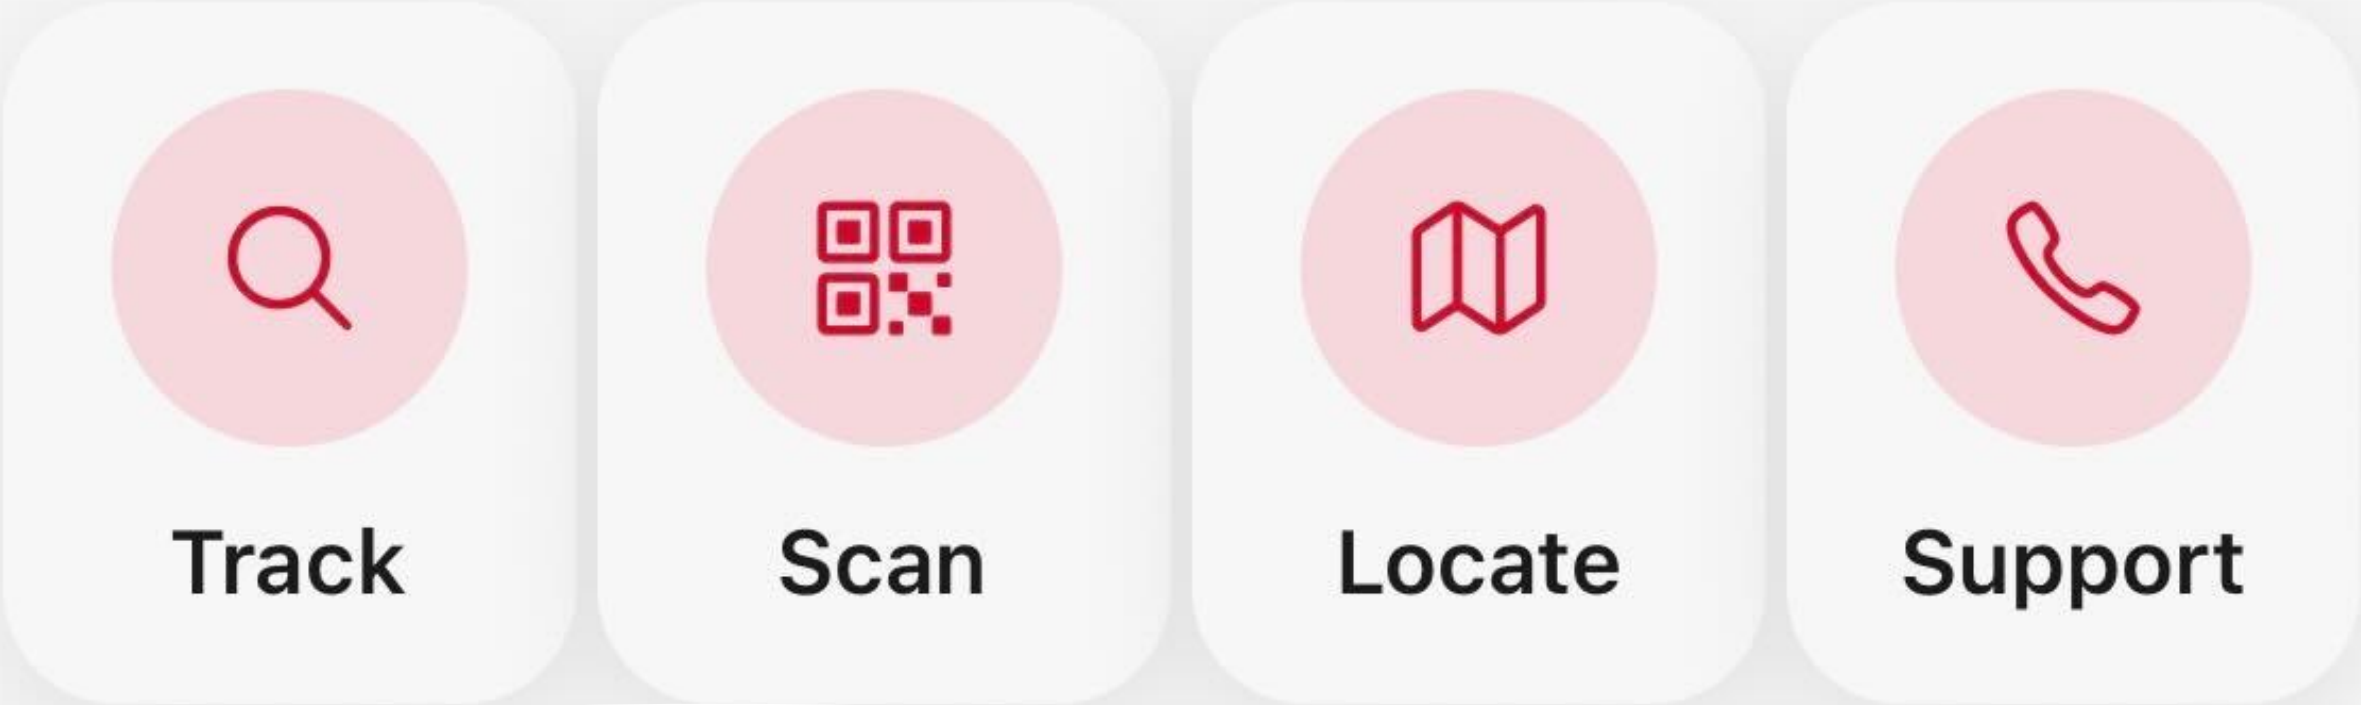
See parcels arriving today and recently delivered at a glance

Slide-Down Tracking

Use the tracking box to enter a tracking number without leaving the page







Quick Actions

Track

Enter a tracking number to instantly view parcels

Scan

Scan a QR code to collect your parcel from a DPD locker.*

Locate

Find the nearest DPD Pickup or collection point

Support

Access FAQs or contact customer care directly

*Not available as of 27/04/2026

Parcel Details

Status at a Glance

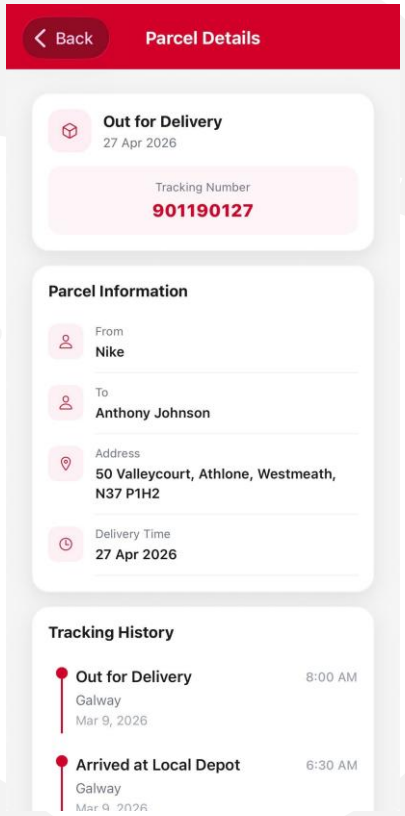
Each parcel screen displays all the relevant parcel details immediately upon entering.

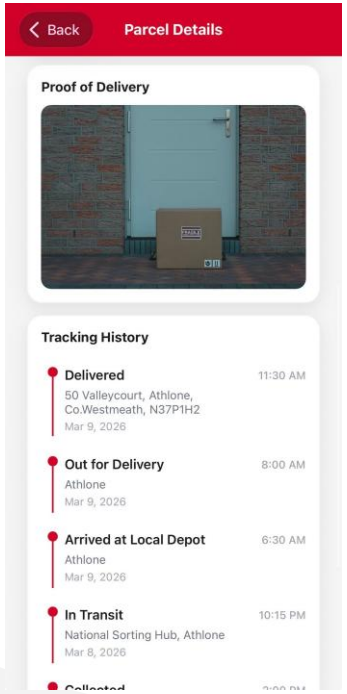
Tracking History & POD

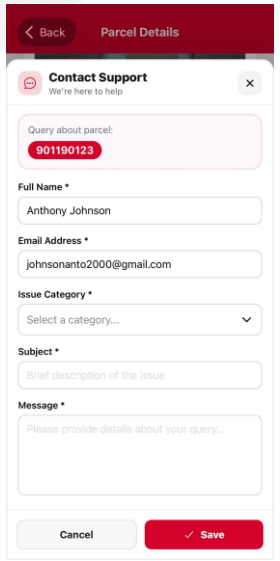
Review every tracking event on a timeline. For delivered parcels, a proof-of-delivery photo can be found here.

Have an Issue?

Contact support directly from this screen with all the relevant details pre-filled.







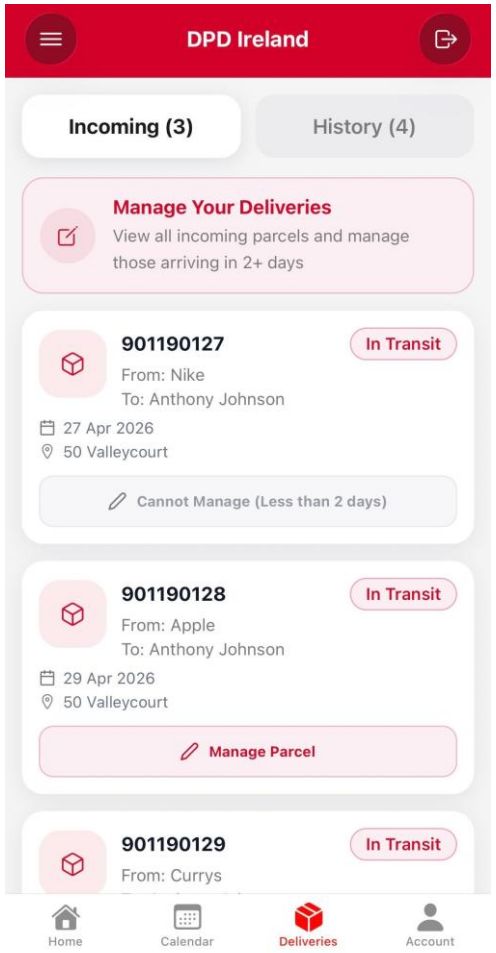
Deliveries

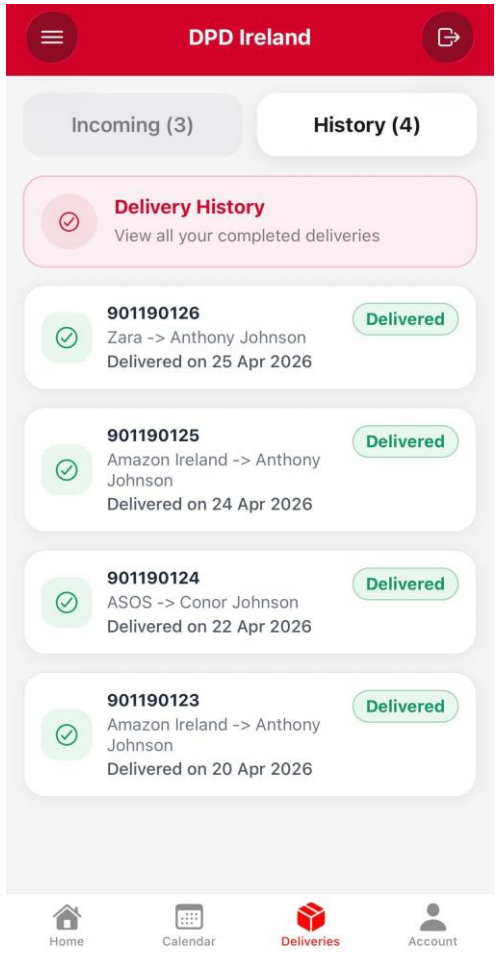
Incoming & History

Toggle between incoming parcels and delivery history.

Manage Delivery

For parcels arriving in two days or more, you can change the delivery date or redirect to a new address.

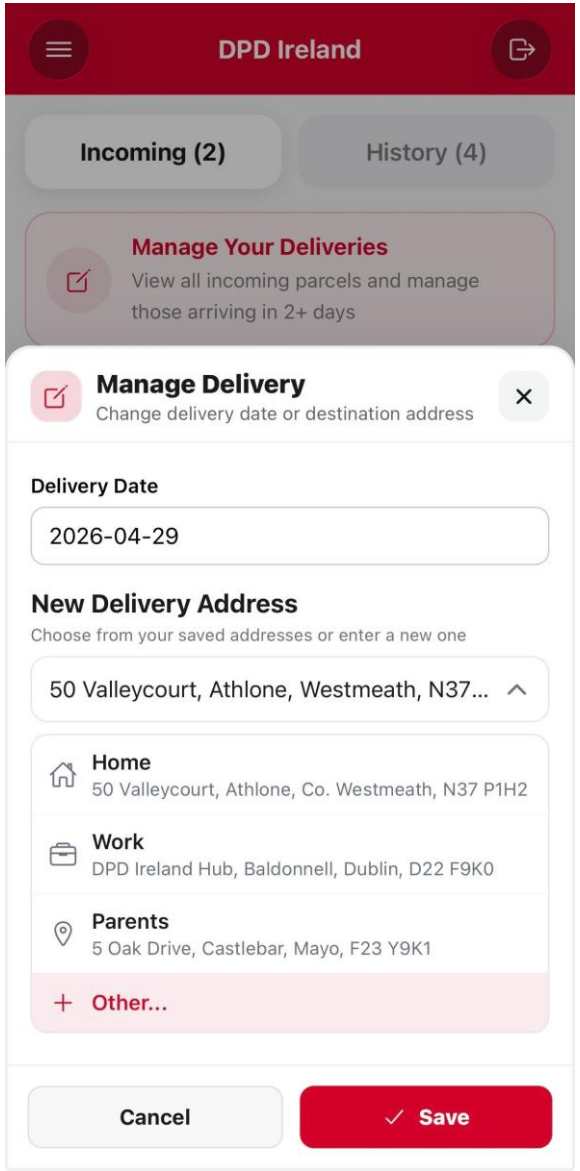




Reschedule or Redirect

Need to change the delivery date or destination?

The Manage Delivery form lets you choose a new date and also pick from the saved addresses in your address book.



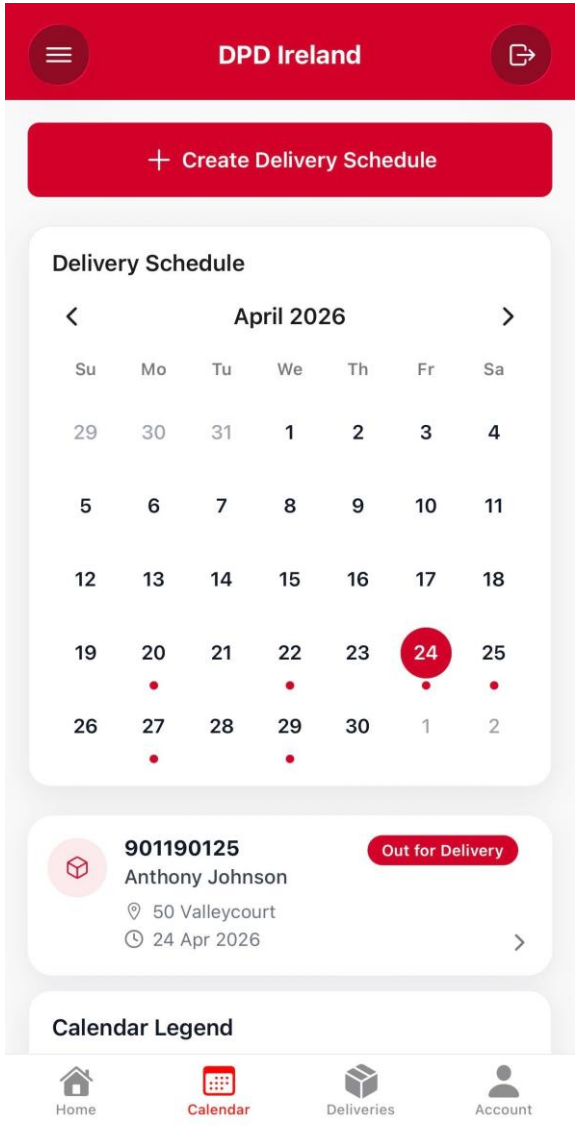
Delivery Calendar

Interactive Calendar

The Calendar screen gives users a clear view of upcoming parcel activity, with marked days showing when deliveries are expected.

What's Inbound?

Selecting a date displays the parcels linked to that day, making it easier to plan around deliveries at a glance.



Delivery Schedules

Delivery Scheduling

Create a new delivery schedule directly from the calendar.

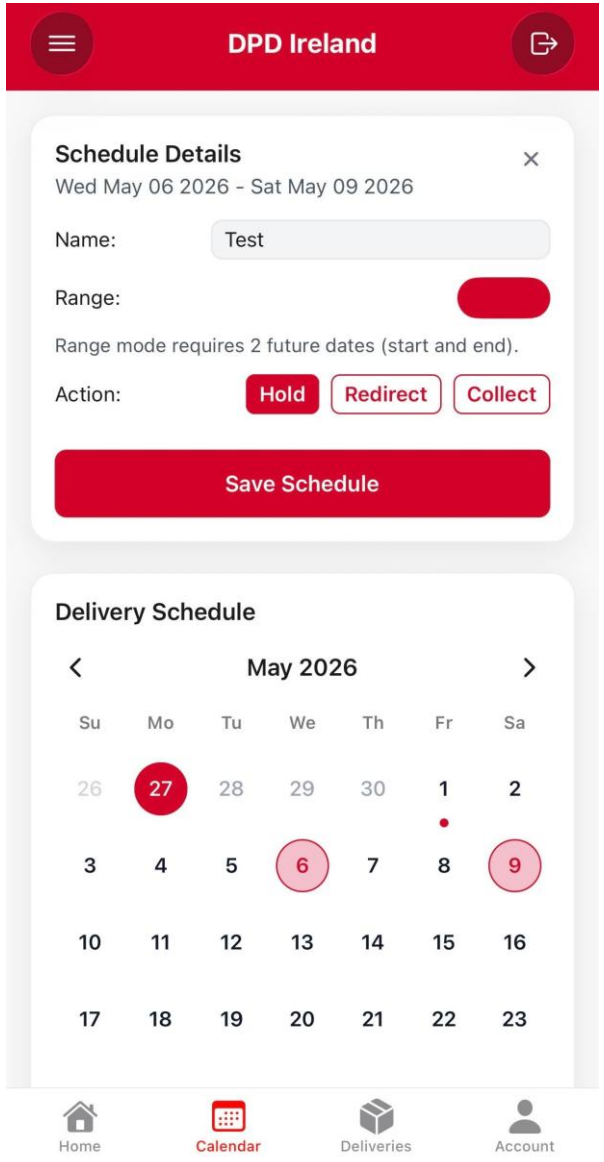
Hold, Redirect or Collect

You can choose to:

- Hold the parcel, and deliver on the next available date
- Redirect to another address saved in the address book or a one time custom address
- Collect from a DPD location near you

Single-day or Range

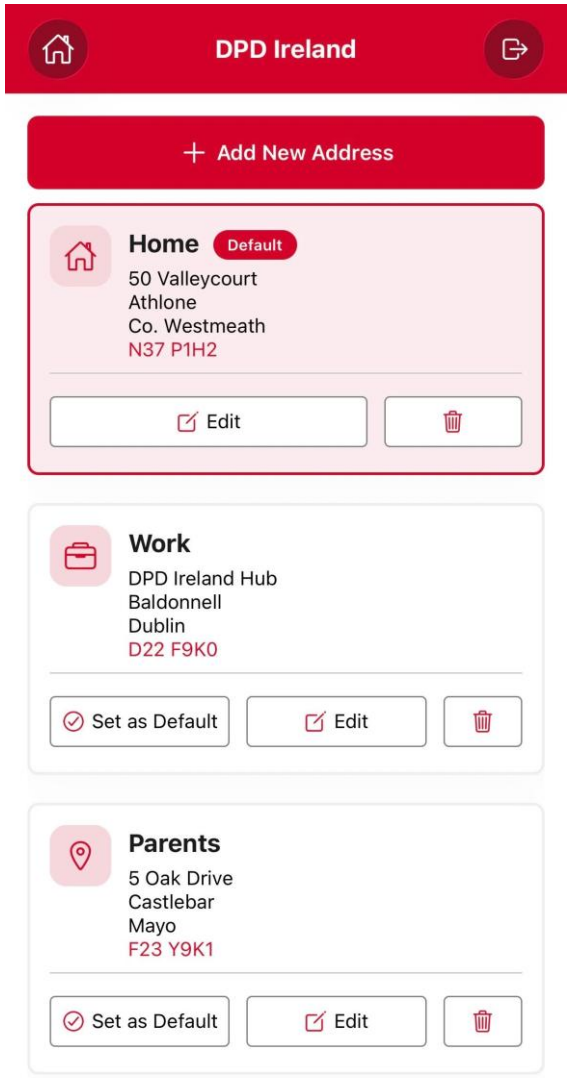
Choose either a single date or select a range.



Address Book

Manage Your Addresses

Add home, work or temporary addresses in your address book. These addresses can then be used throughout the app, without the hassle of typing them out.



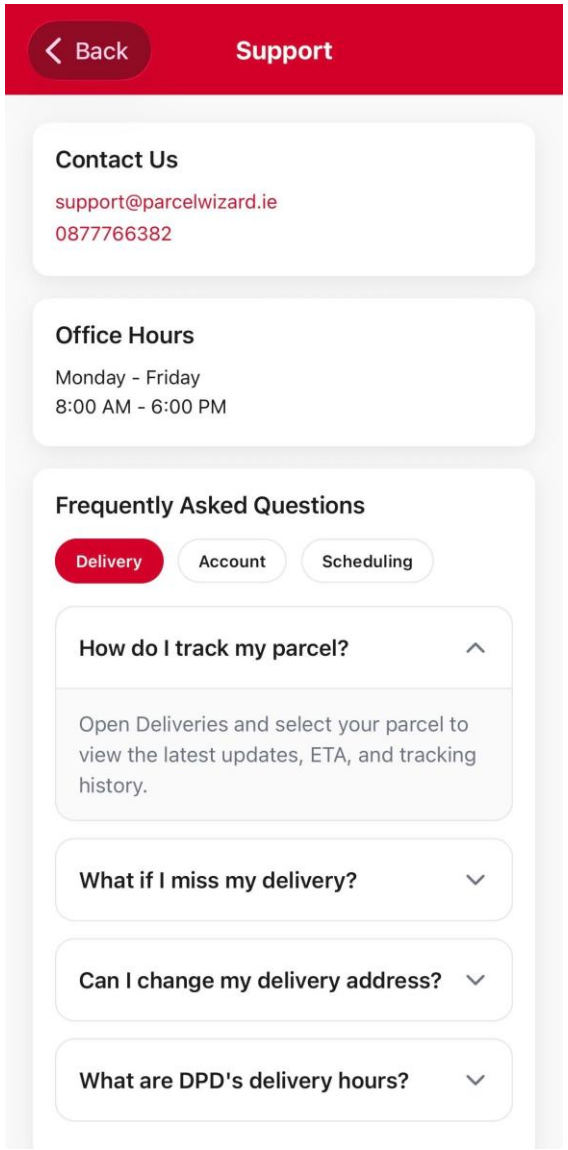
Support & FAQs

Reach Out Anytime

Contact the DPD support team via email or phone. Opening hours subject to change.

Self-Service FAQs

Browse through frequently asked questions organised by category.



App Demo

In the unfortunate event of me not being able to pull up the app in person, here is an app showcase, demonstrating all of its features.

If all goes well, join this meeting:
